

# Household Disinfection Cabinet

This multi-function disinfection cabinet is designed for household use. It utilizes advanced disinfection technology to eliminate bacteria, viruses, and other harmful microorganisms.

## ADDITIONAL IMAGES

## Product Overview

### Advanced Household Hygiene Solution

This multi-function disinfection cabinet provides a comprehensive solution for maintaining household hygiene. Utilizing a combination of strong ozone gas and antibacterial UV light, it effectively eliminates bacteria and viruses from various household items. The unit features a durable stainless steel liner and shelves, ensuring longevity and ease of cleaning, while the integrated PTC heating system maintains a consistent temperature of approximately 60 degrees Celsius for effective drying.

## Disinfection Technology

Disinfection Methods	Ozone Gas, UV Light, Heated Air
Containment Design	Yes

## Construction & Design

Interior Material	Stainless Steel
Shelf Design	Double-layer stainless steel

## Operational Features

### Safety Features

- Auto-shut off
- Ozone leak prevention (Airtight)

Control System	Microcomputer control
Constant Heating Temperature	60 °C
