

Household Electric Fan with Air Purification

This electric fan provides cooling and includes air absorption of vitamins. It features a translucent panel, photocatalyst for fresh air, and an automatic hoop for convenient loading.

Product Overview

Advanced Air Purification Fan

This household electric fan combines powerful cooling performance with integrated air purification technology. Featuring a photocatalyst system and vitamin air absorption, it improves indoor air quality while providing comfortable airflow. Designed for convenience, it includes a 7.5-hour timer, remote control operation, and multiple wind modes to suit any environment.

Technical Specifications

Model Number	FS40-2A
Wind Speeds	3 speeds
Timer Duration	7.5 hours

Features & Controls

Wind Modes

- Natural Wind
- Normal Wind
- Sleep Wind

Control Method

Remote Control, Touch Keys

Safety & Design

Safety Features

Motor Overload Protection

Design Highlights

- Translucent Panel
- Split Decorative Ring
- Automatic Hoop
- Chassis Lock Nut Structure

Air Quality

Air Purification Technology	Photocatalyst, Vitamin Air Absorption
