Overview

Versatile Grain Processing Solution

This fully automatic grain mill is designed for efficient processing of rice, corn, millet, sorghum, and wheat. It features a robust shaft screw conveying system that achieves a high shelling rate of over 90% with minimal breakage. Built with safety and environmental protection in mind, the fully enclosed design ensures clean operation, while the durable construction allows for continuous, heavy-duty use in home or small-scale business environments.

Performance Metrics

Operational Capacity

160 kg/h

Rice Mill Production

300 kg/h

Crusher Productivity

90 %

Shelling Rate

Technical Specifications

Machine Specifications

Feature	Rice Mill	Crusher
Rotary Speed	1500 r/min	5500 r/min
Component Diameter	60 mm (Roller)	N/A
Power Supply	220V, 50Hz / 60Hz	
Motor Power	5 HP	

Key Features

Key Advantages

Easy to Operate • Low Breakage Rate • Fully Enclosed Design • Easy Maintenance • Overload Protection

Compatible Grains

Rice, Corn, Millet, Sorghum, Wheat
