

Household LED Bulb

This LED bulb is designed for household use. It features an aluminum heat sink and a diffused white cover and is compatible with standard E26/E27 sockets.

Product Overview

Energy-Efficient Illumination

This household LED bulb is engineered for superior energy efficiency, serving as an ideal replacement for traditional incandescent lighting. It features an integrated aluminum heat sink to ensure optimal thermal management and longevity. The diffused white cover provides even, comfortable light distribution suitable for various indoor environments.

Technical Specifications

Socket Compatibility	E26/E27
Thermal Management	Integrated aluminum heat sink
Light Distribution	Diffused white cover

Features

Key Benefits

- Energy-efficient design
- Reduced power consumption
- Long-lasting illumination
- Standard socket compatibility
