

Household Lockstitch Sewing Machine

This vintage-style household sewing machine is designed for basic sewing tasks. It features a robust construction, handwheel for manual operation, and a work surface for fabric manipulation.

Overview

Versatile Household Sewing Solution

This household lockstitch sewing machine features a robust, reliable structure designed for precise manufacturing and excellent performance. It supports both sewing and embroidery tasks, utilizing a cam-driven thread take-up and a shuttle mechanism to create a secure double-thread stitch. Suitable for a wide range of materials, it offers flexible operation options to meet diverse user needs in household and clothing industry applications.
