

Household Refrigerator with Copper Evaporator

This refrigerator features a refined copper internal evaporator and return air pipeline to minimize the risk of leakage. It utilizes a high-efficiency, environmentally friendly compressor and detachable airbag door seals for optimal freshness and energy savings.

Product Overview

High-Efficiency Household Refrigeration

This household refrigerator is engineered with a refined copper evaporator and return air pipeline to eliminate internal leakage risks, backed by a 10-year warranty against leaks. It utilizes an environmentally friendly, fluorine-free compressor to deliver rapid cooling while maintaining superior energy efficiency. Designed with modern aesthetics, the unit features an art-glass panel and an optimized, high-density foam insulation system for improved thermal performance.

Technical Specifications

Energy Rating

Class A National Efficiency

Model Number

BCD-336D

Cooling Technology

Optimized Silk-Tube Evaporator

Features

User Convenience

- Detachable Airbag Door Seals
- LED Luxury Ceiling Lighting
- Wide Door Design
- Rapid Cooling Function

Durability & Build

Copper Piping, Leak-Proof Design, High-Density Foam Insulation, Overall Bending Technology

Appearance

Available Panel Finishes

Color	Code
Elegant White	SGW
Champagne Gold	SGC
Chinese Red	SGR
