

Household Refrigerator with LED Lighting

This refrigerator features energy-saving technologies, including a high-efficiency compressor and R600a refrigerant. The appliance is equipped with white LED lighting for clear visibility and reduced energy consumption.

Product Overview

Efficient Household Cooling

This household refrigerator series combines intelligent temperature control with advanced energy-saving technologies to provide reliable food preservation. Featuring a modern, multi-door design, the unit utilizes R600a refrigerant and high-efficiency compressors to minimize power consumption. Integrated white LED lighting ensures clear visibility with lower heat output and a longer lifespan, making it an ideal choice for efficient kitchen management.

Key Features

Diagram showing the energy-saving cooling process and state transitions.

Internal sensor for automatic low-temperature compensation.

Core Technologies

Energy-Saving Design, White LED Lighting, Intelligent Temp Control, Wide Voltage Range, Low Temp Compensation

Performance Data

Specifications by Model

Model	Net Volume (L)	Freezer Vol (L)	Input (W)	Consumption (kWh/24h)
BCD-176CHN	176	66	100	0.34
BCD-196CHN	196	66	100	0.34
BCD-206CHN	206	66	100	0.37
BCD-226CHN	226	100	100	0.39
