

# Household Resin Water Filter

This household water filtration system is designed for dispensing purified water. It utilizes resin filtration technology to remove impurities and improve water quality.

## Overview

### Professional Household Filtration

The FU20L Resin Filter is a high-efficiency household water filtration system designed for consistent, purified water dispensing. Featuring an intuitive two-part construction, it combines a sophisticated filtration mechanism with a transparent reservoir for easy monitoring. Its compact, countertop-friendly design makes it an ideal solution for both residential kitchens and office environments.

## Technical Specifications

Filtration Technology	Resin Filtration
Model Identifier	FU20L

## Features

### Design Features

- Two-part construction
- Transparent reservoir
- Integrated dispensing spigot
- Compact countertop footprint

Control Interface	Power Control, Lock Mechanism
