

# Household Reverse Osmosis Water Purification Machine

This water purification machine utilizes advanced filtration technology to provide clean and safe drinking water. It features a multi-stage filtration system, including sediment filter, activated carbon filter, and reverse osmosis membrane, effectively removing impurities, bacteria, viruses, and heavy metals from the water.

## Product Overview

### Advanced Household Purification

This household reverse osmosis water purification machine provides a reliable solution for clean and safe drinking water. Utilizing a multi-stage filtration system including sediment and activated carbon filters, it effectively removes impurities, bacteria, viruses, and heavy metals. Designed for modern living, the unit features a sleek interface, water quality monitoring, and on-demand purified water delivery.

## Dimensions

Physical Dimensions (mm)	440 x 190 x 405
--------------------------	-----------------

## Filtration Technology

### Filtration Components

- Sediment Filter
- Activated Carbon Filter
- Reverse Osmosis Membrane

## Features

System Indicators	Water Quality Display, Filter Status Monitoring, User-Friendly Interface
