

# Household Reverse Osmosis Water Purification System

This reverse osmosis water purification system provides multi-stage filtration for household use. It features an LCD display and offers easy operation to provide purified water.

## Product Overview

### High-Efficiency Household Purification

This advanced reverse osmosis water purification system ensures superior water quality for household consumption. It features automated water quality detection, intelligent wastewater discharge, and a streamlined maintenance process with easy-to-change filter cartridges. Designed for reliability, the system integrates a professional-grade pump and RO membrane to deliver clean, great-tasting drinking water.

## Technical Specifications

### Filter Configuration

- 10-inch PP
- UDF
- CTO
- RO Membrane
- T33 Post-Filter

### Key Features

Automatic Quality Detection, Auto-Flush, Wastewater Adjustment, IHP RO Membrane

## Model Information

Model Identifier	N-RO50X5
Secondary Reference	MYRO-1
