

Household Space Heater

This space heater is designed for household use. It features a circular heating element enclosed within a protective frame and is mounted on a stable base.

Product Overview

Efficient Household Heating

This space heater is engineered for reliable, consistent warmth in small to medium-sized residential areas. The unit features a circular heating element housed in a robust protective frame, ensuring safety while maintaining optimal performance. With adjustable settings accessible via the base-mounted switches, users can easily control heat output for personalized comfort.
