

Household Ventilating Fan with Square Grille

This ventilating fan is designed for household use. It features a square grille design for optimal airflow and a side-mounted exhaust port for easy duct connection.

Product Overview

Compact Ventilation Solution

This household ventilating fan features a square grille design optimized for effective air circulation in residential environments. Designed for ease of installation, the unit provides consistent performance for bathrooms, kitchens, and other indoor spaces. With a balanced focus on power efficiency and low operational noise, it serves as a reliable solution for maintaining air quality.

Technical Specifications

Product Number	BPT15-12-1G
Fan Size	150 mm
Key Features	Square Grille, Compact Design, Low Noise, Household Use

Performance Metrics

Performance Summary

102 m³/h
Air Delivery

22 W
Power Consumption

1130 r/min
Rotation Speed

48 dB
Noise Level
