

Household Ventilation Exhaust Fan

This electrical fan is designed for air circulation and exhaust. It features a white plastic grille with horizontal slats arranged in a concentric square pattern.

Overview

Efficient Household Ventilation

This square-shaped electrical exhaust fan is engineered for effective air circulation and ventilation in residential environments. Designed for versatile installation, it can be mounted on either walls or ceilings to maintain optimal indoor air quality. The unit features a durable white plastic grille with a clean, concentric square slat design that blends seamlessly into modern interiors.

Technical Specifications

Design Features

- Square shape profile
- White plastic construction
- Concentric square slat grille

Primary Application

Household Ventilation • Air Circulation

Installation

Wall Mount, Ceiling Mount
