

Household Ventilation Fan

This electrical fan is designed for air circulation and ventilation. It features a protective wire cage and a rounded base for stability.

Product Overview

Efficient Household Ventilation

This household ventilation fan is engineered to provide reliable air circulation and ventilation for residential environments. Featuring a robust protective wire cage and a three-blade design, it balances safety with performance. The unit is built with a stable, rounded base and includes an intuitive front-mounted control panel for ease of use.

Technical Specifications

Application

Household • Ventilation • Air Circulation

Model Number

00208

Number of Blades

3

Design Features

Protective Wire Cage, Rounded Base, Front Control Panel
