

Household Ventilation Fan 120mm

This ventilation fan is designed for household use. It removes stale air and moisture to promote air circulation and prevent mold and mildew growth.

Product Overview

High-Efficiency Household Ventilation

This 120mm ventilating fan is engineered to provide reliable air extraction for bathrooms, kitchens, and other confined living spaces. Designed to effectively remove stale air, moisture, and odors, it helps maintain a healthy indoor environment while preventing the growth of mold and mildew. Its compact design and standard sizing ensure ease of integration into residential ventilation systems.

Technical Performance

Air Delivery

120 m³/h

Air Flow

1130 r/min

Rotation Speed

Power Consumption

31 W

Noise Level

45 dB

Physical Specifications

Fan Size

120mm / 4.8in

Model Identifier

BPT12-14-2E

Measurement

83 x 28 x 46 cm
