

Household Ventilation Fan

This is an electric fan designed for household ventilation. Its round shape and robust construction make it suitable for various applications.

Overview

Professional Ventilation Solution

The VRM-150WW is a high-performance household ventilation fan designed for efficient air circulation and environmental control. Its robust construction ensures reliability, while the optimized engineering provides effective airflow for residential spaces. This unit is an ideal choice for buyers seeking a balance between durable build quality and consistent operational performance.

Technical Specifications

Model Number	VRM-150WW
Product Type	Household Ventilation Fan
Form Factor	Round
Quality Compliance	ISO 9001
