

Household Ventilation Fan

This electric fan is designed for household ventilation. It features a multi-blade design for efficient air circulation.

Product Overview

Efficient Household Ventilation

The 52BW electrical fan is a versatile ventilation solution engineered for effective air circulation in residential environments. Designed with a specialized multi-blade system, this unit ensures consistent airflow and performance. It serves as a reliable component for household electrical appliances and ventilation systems.

Technical Specifications

Model Number	52BW
Primary Application	Household Ventilation, Air Conditioning Equipment, Electric Fans

Design Features

Key Benefits

- Efficient air circulation
- Suitable for household electrical appliances
- Optimized for ventilation equipment

Blade Configuration	Multi-blade design
