

# Household Waste Bin Mould

Mould designed for creating household waste bins. These bins are made of durable plastic and are designed for easy cleaning and maintenance.

## Product Overview

### High-Efficiency Waste Bin Moulding Solutions

This series of household waste bin moulds is engineered for high-volume production of durable, daily-use garbage bins. Designed with precision, these moulds support various shapes, sizes, and configurations, including foot-pedal operated models. They are optimized for manufacturing efficiency, ensuring easy maintenance and consistent quality for consumer-grade plastic waste management products.

## Technical Specifications

### Available Mould Models

- Household trash mould\_230
- Household trash mould\_229
- Household trash mould\_228
- Household trash mould\_227
- Household trash mould\_226

### Key Design Features

Foot Pedal Compatible • Durable Plastic • Easy Maintenance

### Application

Household, Waste Disposal, Daily Use
