

Household Water Filter

This stainless steel water filter is designed for household water purification. It features a cylindrical housing with rounded ends and provides effective filtration for cleaner and healthier water.

Overview

High-Efficiency Household Filtration

The QG-U1-200A household water filter provides reliable purification for tap water systems. Utilizing advanced UF membrane technology, it ensures superior water quality for domestic use while maintaining a consistent outflow rate. Its automatic flushing mechanism simplifies maintenance, making it an ideal solution for consistent, cleaner water.

Technical Specifications

Operating Pressure

0.1 Mpa

Minimum Pressure

0.5 Mpa

Maximum Pressure

Filtration Precision	0.01 μ
Filter Type	UF

Performance

Outflow Rate	3 L/min
Output Turbidity	d1.NTU

Installation

Pipe Interface	G1/2"
Operating Temperature Range	5-38

Logistics

Dimension Specifications

Component	Dimensions
Unit Dimension	1170x365MM
Master Carton (6 PCS)	625x380x430MM

Features

Core Features	Automatic Flush, Tap Water Compatible, Household Application
