

Household Water Purification System

This household electrical appliance is designed for water purification. It falls under the category of water dispensers and aims to provide clean and purified water for domestic use.

Overview

Advanced Household Water Purification

This household water purification system is designed to provide clean and safe drinking water directly from civic tap water sources. Utilizing a multi-stage filtration process, including intenerating filters, active carbon cartridges, and ultrafiltration hydrophilic membranes, it ensures high-quality output. The system features a generous 17.4L gross volume capacity, making it an efficient and reliable appliance for domestic water treatment needs.

Technical Specifications

Outflow Flux

250 ml/min

Average Outflow

Applicable Water Source

Civic tap water

Gross Volume

17.4 L

Dimensions

315 x 315 x 460 mm

Filtration System

Filtration Stages

- Intenerating filters
- Active carbon cartridge
- Ultrafiltration hydrophilic membrane
