

Household Water Purifier with Ceramic Filter

This water purifier features a ceramic cartridge filter. Its housing is made of health food-grade plastic and includes a hand-catch-type flip.

Product Overview

Compact Ceramic Water Filtration

This household water purifier utilizes a ceramic filtration system to provide clean, safe water for daily drinking and cooking needs. Its compact, two-part design features a white upper section paired with a transparent blue reservoir, making it an excellent space-saving solution for modern kitchens. The system is engineered for ease of maintenance and reliable performance in residential environments.
