

Household Water Purifier with Reservoir

This household water purifier features a transparent reservoir and filtration system. It is designed for home use to purify drinking water.

Product Overview

Clean Water for Your Home

This household water purifier features a high-capacity reservoir designed for safe and convenient daily drinking water access. The system integrates a vertical filtration module to effectively treat tap water, ensuring a clean and reliable source for your family. Its compact, transparent design allows for easy monitoring of water levels while maintaining a professional standard of hygiene.

Technical Specifications

Filtration Components

- Cylindrical filtration core
- Vertical flow-through module

Intended Use

Residential • Indoor

System Type

Gravity-fed filtration with reservoir

Design Features

Transparent Reservoir, Integrated Dispensing Valve, Compact Footprint, Consumer-grade
