

# HSS and Bimetal Power Saw Blades

HSS and bimetal power saw blades are designed for cutting a variety of materials, including metals, plastics, and wood. Bimetal blades combine spring steel with high-speed steel for enhanced durability and cutting performance.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Cutting Solutions

These power saw blades are engineered for precision and durability, utilizing either high-speed steel (HSS) or bimetal construction to meet rigorous industrial demands. Designed for versatility, they are suitable for cutting a wide range of materials including various metals, plastics, and wood. With uniform hardness and sharp, wear-resistant teeth, these blades provide stable, efficient performance for demanding cutting tasks.

## Technical Specifications

### Size Range

- 12 inch (300mm)
- 30 inch (750mm)

### Tooth Options

- 4T
- 6T
- 10T

### Blade Material

HSS, Bimetal

## Logistics & Finishing

### Packaging

Unit	Quantity
Plastic Box	10 pcs
Carton	100 pcs

### Customization

Custom Color • OEM Available

### Surface Finish

Paint with printing
