

HSS Hole Saw for Wood, Metal, Plastic

This high-speed steel (HSS) hole saw is designed for cutting precise and clean holes in various materials, including wood, metal, and plastic. Its durable construction features hardened teeth for extended life and efficient cutting performance.

Product Overview

Professional Grade HSS Hole Saw

This high-speed steel (HSS) hole saw is engineered for precision and durability across a wide range of applications. Designed to deliver clean, accurate cuts in wood, metal, and plastic, it features hardened teeth for extended tool life and efficient performance. With an integrated pilot drill for exact hole placement and a design optimized for easy plug removal, this tool is an essential asset for electrical, plumbing, and general construction projects.

Technical Details

Key Features

- Hardened teeth for extended lifespan
- Includes pilot drill for accurate placement
- Optimized design for easy plug removal
- Clean cutting performance

Material Composition	High-Speed Steel (HSS)
Compatible Materials	Wood, Metal, Plastic

Applications

Target Industries

Electrical • Plumbing • Construction
