

HSS Rectangular Turning Tool for Shearing Machines

This rectangular turning tool is made from 9341 HSS and features a ground finish. Designed for metal forming machines, particularly shearing machines, it provides durability and accuracy for clean and precise cuts.

Product Overview

Professional HSS Turning Tool

This high-precision rectangular turning tool is engineered specifically for use with industrial shearing machines. Constructed from 9341 High-Speed Steel (HSS), it provides exceptional durability and wear resistance for demanding metal forming applications. The ground finish ensures superior surface accuracy and consistent performance throughout the service life of the tool.

Technical Specifications

Material Grade	9341 HSS (High-Speed Steel)
Geometry	Rectangular
Finish	Ground
Compatibility	Shearing Machines, Metal Forming
