

HSS Step Drill Bit Set

This HSS step drill bit set is designed for drilling clean, accurate holes in materials like steel, aluminum, wood, and plastic. Each bit's conical shape with multiple steps allows drilling holes of different diameters.

Product Overview

Precision Drilling Solution

This 3-piece HSS step drill set is engineered for clean, accurate hole creation in thin sheet metal, wood, and plastic without the need for pre-drilling. Featuring a durable Titanium-Nitride coating, these bits are designed to resist wear and prevent deformation during operation. The stepped geometry allows for multiple hole diameters with a single tool, making it an essential addition for electrical, plumbing, and HVAC professionals.

Technical Specifications

Coating

Titanium-Nitride

Drill Sizes Included

- 4-12 mm
- 4-20 mm
- 4-32 mm

Key Features

- No pre-drilling required
- Prevents material deformation
- Deburring capability
- Includes metal storage case

Material

High-Speed Steel (HSS)

Suitable Materials

Sheet Metal, Steel, Aluminum, Wood, Plastic

Target Industries

Electrical, Plumbing, HVAC
