

Humidity Control Valve Assembly

This component is designed for use in humidity control systems. It features a tiered structure with a gold-colored element, constructed from durable black rubber or plastic.

Product Overview

Precision Humidity Control Component

This Humidity Control Valve Assembly is engineered for integration into professional-grade humidifier and dehumidifier systems. Featuring a robust, tiered design with a central metallic interface, it serves as a critical component for regulating moisture levels. The assembly is built for durability and ease of mounting, ensuring seamless installation into your existing climate control equipment.

Technical Details

Key Design Features

- Tiered circular structure
- Central metallic ring interface
- Lateral cylindrical post
- Integrated mounting flange

Compatible Systems

Humidifiers • Dehumidifiers • HVAC Control Systems

Construction Materials

Industrial-grade Rubber, Reinforced Polymer, Metallic Alloy

Mounting Points

3 points
