Product Overview

Professional HVAC Bypass Solution

This high-quality HVAC bypass valve is engineered for precision fluid diversion in heating and plumbing systems. Constructed from durable brass, it offers superior corrosion resistance and long-term reliability in demanding environments. The integrated adjustable screw allows for precise control over system pressure and flow rates, making it an essential component for efficient HVAC&R system management.

Technical Specifications

Application

HVAC&R • Heating Systems • Plumbing

Product Code	Y00500
Connection Specification	G1/2 * G3/8
Material	Brass, Corrosion Resistant

Features

Key Features

- Adjustable bypass screw for flow control
- Threaded connection port
- Compression fitting port
- Durable brass construction
