Product Overview

Professional HVAC Double Check Valve

This double check valve is engineered specifically for HVAC&R applications to ensure reliable unidirectional flow and prevent backflow in piping systems. Built for durability and long-lasting performance, it is suitable for a wide range of residential, commercial, and industrial plumbing environments. The design prioritizes system integrity, effectively protecting against contamination while maintaining efficient flow control.

Technical Specifications

Available Sizes

Product Code	Size
Y00066	15mm
Y00067	22mm
Y00068	28mm

Connection Type

Copper to Copper (CxC)

Suitable Applications

Residential, Commercial, Industrial, HVAC&R

Manufacturing Standards

Manufacturing Standards

- 20 years of manufacturing expertise
- Green manufacturing processes
- Large-scale production capacity
- Quality and cost-efficiency focus
