Product Overview

Professional HVAC Ball Valve Solution

This full bore brass ball valve is engineered specifically for demanding HVAC and plumbing applications. Designed for longevity and reliable performance, it features a robust construction that ensures minimal pressure drop and precise flow control. With over 20 years of manufacturing expertise behind its design, this valve provides a dependable shut-off solution for various fluids and gases in professional environments.

Technical Specifications

Valve Type	Full Bore Ball Valve
Material	Brass
Operation Method	Lever Handle
Connection Type	CxC

Available Models

Available Sizes

Product Code	Size
F00231	15mm
F00232	22mm
F00233	28mm

Key Features

Key Benefits	Full Bore Design, Corrosion Resistant, Minimal Pressure Drop, Reliable Shut-off
