Product Overview

Professional HVAC Gas Control

This high-quality gas cock valve is engineered specifically for HVAC and plumbing systems, providing reliable gas flow control. Designed with durable brass construction and compression fittings, it ensures secure, leak-free connections for critical gas line applications. With a focus on manufacturing excellence and industry-standard performance, this valve serves as a dependable component for professional heating and plumbing installations.

Technical Specifications

Size Specification	15 mm
Model Code	Y00111
Connection Type	Compression Fittings
Applications	HVAC, Plumbing, Gas Line Systems

Manufacturing Standards

Manufacturing Features

- 20 years of industry manufacturing expertise
- Green manufacturing processes
- Large-scale production capacity
- Guaranteed quality and cost-efficient design
