Product Overview

Professional Air Filtration Solutions

This comprehensive range of HVAC air filters is engineered for high-performance air purification in ventilation systems. The product line encompasses pre-filters, secondary filters, and HEPA filters, providing a multi-stage approach to removing particulate matter and dust. Designed for both commercial HVAC systems and industrial dust collection, these durable filters are available in various configurations to meet diverse air quality requirements.

Filter Categories

Available Filter Types

- Prefilters (Cardboard, Metal Mesh, Washable)
- Secondary Filters (Pocket, V-Bank, Minipleat Panel)
- HEPA Filters (Minipleat, Deep Pleated Box, V-Bank)
- Dust Collector Cartridge Filters

Technical Specifications

Filter Media Options	Polyester, Cellulose, Nanofiber, Synthetic Fiber
Maintenance	Yes
