

# HVAC Motor Run Capacitor

This CBB65 series capacitor is designed for HVAC and refrigeration systems. It is used for motor start and run applications and incorporates built-in protection.

## ADDITIONAL IMAGES

## Product Overview

### CBB65 Series HVAC Capacitor

The CBB65 series capacitor is engineered specifically for HVAC and refrigeration systems, facilitating reliable motor start and run operations. Featuring a robust round metal case and an integrated anti-explosion device, these capacitors are built for safety and durability. They offer low dissipation factors, high insulation resistance, and excellent self-healing properties to handle impact currents and overloads effectively.

## Technical Specifications

Available Capacitance	60+5 $\mu$ F, 50+5 $\mu$ F, 50 $\mu$ F, 10 $\mu$ F, 5 $\mu$ F
Voltage Ratings	370VAC, 440VAC
Frequency	50/60Hz
Capacitance Tolerance	$\pm$ 5%

## Safety & Compliance

### Safety Features

Anti-explosion device • Protected • No PCBs

### Interrupting Capacity

**10000 A**  
AFC Rating

## Design & Construction

### Construction

- Round-shape metal case
- Dual lug terminals
- Self-healing material
- Quick-connect terminals
