

HVAC Pressure Reducing Valve

This pressure reducing valve is engineered to maintain a consistent downstream pressure, protecting sensitive equipment from pressure surges and ensuring optimal system performance. It is suitable for a variety of applications within heating, ventilation, air conditioning, and refrigeration systems.

Product Overview

Professional HVAC Pressure Regulation

This pressure reducing valve is engineered to provide precise pressure control within heating, ventilation, air conditioning, and refrigeration (HVAC&R) systems. By maintaining consistent downstream pressure, it protects sensitive system components from surges and ensures optimal energy-efficient performance. This solution is built on two decades of industrial expertise, ensuring reliability and long-term durability for professional installation requirements.

Technical Specifications

Available Models

Code	Size
Y00106	1/2"
Y00107	3/4"

Core Features

Key Benefits	Pressure Regulation, HVAC Optimized, Energy Efficient, Equipment Protection, Industrial Grade
