

HVAC Pressure Reducing Valve

This pressure reducing valve is designed for HVAC&R systems to automatically reduce and regulate fluid or gas pressure. It is constructed from durable materials for reliable performance and protects downstream equipment from overpressure.

Product Overview

Precision Pressure Regulation

This pressure reducing valve is engineered specifically for HVAC&R systems to ensure reliable fluid and gas pressure management. By automatically regulating downstream levels, it effectively protects critical equipment from damage caused by overpressure. The valve features an adjustable design, allowing for consistent performance and flexible integration into various professional environments.

Technical Specifications

Nominal Size	1/2 inch
Application Compatibility	HVAC, Refrigeration, Fluid Systems, Gas Systems

Key Features

Core Advantages

- Automatic pressure regulation
- Adjustable pressure settings
- Compact, space-saving design
- Durable construction for long-term reliability
