Overview

Professional HVAC Pressure Control

This high-performance pressure reducing valve is engineered to provide precise fluid and gas pressure regulation within heating, ventilation, and air conditioning systems. Designed for durability and efficiency, it integrates a clear pressure gauge for real-time monitoring and a control knob for seamless pressure adjustments. It offers a reliable, one-stop solution for maintaining optimal system pressures in demanding HVAC&R environments.

Technical Specifications

Product Code	Y00105
Connection Size	22mm x 22mm
Key Features	Integrated Pressure Gauge, Adjustable Control Knob, HVAC&R Compatible, Corrosion-Resistant Body
