

HVAC Refrigeration Tool Kit with Aluminum Case

This comprehensive tool kit is designed for HVAC and refrigeration system maintenance. The kit includes pressure gauges, hoses, and various accessories, all secured within a durable aluminum case with protective foam padding.

Product Overview

Comprehensive HVAC Maintenance Solution

The VTB-5A Refrigeration Tool Kit is a professional-grade set designed to provide essential instrumentation for HVAC maintenance and repair. Housed in a durable silver aluminum case with protective foam padding, the kit ensures that all specialized gauges, hoses, and handheld instruments remain secure and organized. This complete assembly is engineered to meet the demanding requirements of field technicians working on complex refrigeration systems.
