Product Overview

Professional HVAC Service Solution

This straight service valve is engineered for demanding HVAC&R applications, providing reliable access for maintenance, testing, and system charging. Designed for durability and performance, it ensures a secure, leak-free connection across various refrigerant types and system pressures. Benefit from robust manufacturing expertise optimized for air conditioning, refrigeration, and heat pump systems.

Technical Specifications

Available Configurations

Code	Size
E00017	15mm x 1/2"
E00018	22mm x 3/4"

System Applications

Air Conditioning, Refrigeration, Heat Pump Systems

Company Standards

Key Value Proposition

- 20 years of heating and plumbing industry expertise
- Cutting-edge, large-scale manufacturing
- Guaranteed quality and cost efficiency
- Green manufacturing processes
