## Product Overview

### HVAC Single Check Valve

This single check valve is engineered for HVAC&R systems requiring reliable, unidirectional flow control. Featuring durable copper-to-copper (CxC) connections, it is built to support efficient heating and plumbing installations. With a focus on quality and green manufacturing standards, this component offers a professional-grade solution for various system configurations.

## Technical Specifications

### Model Reference

Model Code	Size
Y00063	15mm
Y00064	22mm
Y00065	28mm

**Connection Type** CxC (Copper to Copper)

**Available Sizes** 15mm, 22mm, 28mm

## Application

### Suitable Applications

HVAC • Refrigeration • Heating Systems • Plumbing
