

# HVAC System Component

This is a component used in HVAC systems. It plays a crucial role in refrigeration and ventilation applications.

## Product Overview

### HVAC System Component

This specialized HVAC system component is engineered for demanding industrial refrigeration and ventilation applications. Constructed as a durable material sheet, it provides reliable performance for systems requiring precise sizing and thermal management. Its robust build quality ensures consistent operation in high-performance airflow and cooling environments.

## Technical Specifications

### Physical Dimensions

**1520 mm**

Length

**1020 mm**

Width

**1 mm**

Thickness

### Model Identifiers

42, V4535

### Performance Rating

0.5 kW
