Product Overview

Professional HVAC Water Circulation Pump

The DP-255A is a robust, high-performance water pump engineered for reliable circulation in HVAC&R systems, residential boosting, and commercial water transfer. Its compact, corrosion-resistant design ensures longevity in demanding environments, while the integrated pressure control and monitoring systems allow for fully automated operation. Built with high-quality materials including a cast iron body and brass fittings, this pump provides a consistent and efficient solution for professional water management.

Technical Specifications

System Features

- Integrated Pressure Gauge
- Automatic Pressure Control Switch
- Debris-filtering Strainer
- Corrosion-resistant construction

Materials

Cast Iron Body, Copper Piping, Brass T-Connector, Brass Foot Valve

Applications

Suitable Applications

- HVAC&R System Circulation
- Residential Water Boosting
- Well Water Extraction
- Agricultural Irrigation
- Commercial Water Transfer
