

HVAC Water Filter with Brass Housing

This water filter is designed for HVAC&R systems, providing efficient filtration. Its durable brass construction ensures long-lasting performance and corrosion resistance.

Product Overview

Professional HVAC Filtration

This high-performance brass water filter is engineered specifically for HVAC&R systems, ensuring optimal fluid cleanliness and protecting downstream components from harmful impurities. Constructed with durable brass, it offers superior corrosion resistance and long-term reliability in demanding environments. The integrated design includes a transparent bowl for real-time visual inspection and a pressure gauge for precise system monitoring.

Technical Specifications

Housing Material	Brass
Primary Application	HVAC, Refrigeration, Water Filtration
System Monitoring	Yes
Inspection	Transparent bowl for easy condition monitoring

Performance Metrics

Pressure Range

10 psi

Min Pressure

150 psi

Max Pressure
