

HVAC Water Pump

This water pump is engineered for efficient water circulation in HVAC&R systems. Its durable construction ensures reliable performance for both residential and commercial applications.

Product Overview

High-Efficiency HVAC Water Pump

The HFM-80/85 is a robust water pump engineered specifically for diverse HVAC&R applications. It is designed to provide efficient water circulation and reliable performance, making it suitable for both residential and commercial heating, ventilation, air conditioning, and refrigeration systems. Its durable construction ensures long-lasting operation, while the design optimizes flow rates and pressure to enhance overall system efficiency.

Technical Details

Model Number	HFM-80/85
Applications	HVAC, Refrigeration, Heating, Ventilation, Residential, Commercial

Performance Features

Key Benefits

- Durable construction for longevity
- Optimized flow rates
- Reliable pressure management
- Enhanced system efficiency
