

# HVAC&R Drain Cock with Barbed Outlet

This drain cock valve is designed for draining fluids in HVAC&R systems. It features a threaded connection and a barbed outlet for hose attachment.

## Drain Cock

Code	Spec.
Y00560	1/4"

### ADDITIONAL IMAGES

## Overview

### Professional HVAC&R Drain Solution

This drain cock is engineered for efficient fluid management in heating, ventilation, air conditioning, and refrigeration systems. Featuring a robust construction resistant to corrosion and chemical degradation, it ensures reliable performance during system maintenance or decommissioning. The integrated barbed outlet allows for secure hose attachment, while the manual knob provides precise flow control for water, refrigerants, and oils.

## Technical Specifications

### Connection Specification

**0.25 inch**

Connection Size

Product Code	Y00560
Outlet Type	Barbed outlet for hose attachment
Operation	Manual knob control

## Application & Compatibility

### Primary Applications

- HVAC&R System Draining
- System Maintenance
- Repair Operations
- Decommissioning

Compatible Fluids	Water, Refrigerants, Oils
-------------------	---------------------------

## Manufacturing & Quality

### Manufacturing Standards

Green Manufacturing • Corrosion Resistant • Chemical Resistant

### Service Capabilities

- Large-scale production capacity
- One-stop solution provider
- Cost-efficient manufacturing
