

HVAC&R Water Circulation Pump

This water pump is designed for efficient water circulation in various applications. Its robust construction ensures durability and long-lasting performance.

Overview

High-Efficiency HVAC&R Circulation

The SXR-200 water circulation pump is engineered for reliability and high performance within professional HVAC and refrigeration systems. Featuring a powerful motor, it ensures consistent flow rates while maintaining quiet and low-vibration operation. Its compact design facilitates straightforward installation even in constrained mechanical spaces, making it a robust solution for diverse pumping needs.

Technical Specifications

Primary Applications

- HVAC Systems
- Refrigeration Systems
- General Water Circulation

Operational Characteristics

Quiet Operation, Low Vibration

Installation

Compact design suitable for tight mechanical spaces
