

HVLP Gravity Feed Spray Gun

This HVLP (High Volume Low Pressure) air spray gun is engineered to apply fine and consistent finishes to surfaces. It features a gravity-feed design complemented by adjustable fluid control, air pressure regulator, and spray pattern capabilities.

Product Overview

High-Efficiency HVLP Spray Technology

This HVLP (High Volume Low Pressure) gravity feed spray gun is engineered for professional-grade surface finishing. It provides exceptional material transfer efficiency, significantly reducing overspray and waste. Designed for versatility, it is compatible with a wide range of coatings including paints, lacquers, and stains, making it an essential tool for high-quality finishing applications.

Technical Specifications

Operating Air Pressure

2 bar Min Pressure	3.5 bar Max Pressure
------------------------------	--------------------------------

Standard Nozzle Size	1.4 mm
Air Consumption	6 cfm
Spray Pattern Width	160-260 mm
Paint Cup Capacity	600 ml

Features & Compliance

Feed Type

Gravity Feed

Certifications
