

HVLP Gravity Feed Spray Gun

The HVLP (High Volume Low Pressure) gravity feed spray gun is designed for a variety of painting applications. It features a gravity feed cup for efficient material use and a low pressure system to minimize overspray.

Overview

Professional HVLP Spray Technology

This High Volume Low Pressure (HVLP) gravity feed spray gun is engineered for high-efficiency material transfer with minimal overspray. Designed for versatile professional use, it offers precise control over paint flow and spray patterns through an adjustable nozzle system. It serves as an ideal solution for tasks ranging from automotive refinishing to high-quality furniture finishing.

Technical Specifications

Key Features

- Adjustable nozzle for spray pattern control
- Optimized for material efficiency
- Low pressure system reduces waste
- Gravity cup configuration

Spray Technology	HVLP (High Volume Low Pressure)
Feed System	Gravity Feed
Suitable Applications	Automotive Refinishing, Furniture Finishing, General Purpose Painting
