

HVLP Gravity Feed Spray Gun

This HVLP (High Volume Low Pressure) gravity feed spray gun is designed for applying a variety of coatings with reduced overspray and improved transfer efficiency. Its adjustable fluid and air controls provide precise settings for optimal atomization and spray pattern, making it suitable for automotive refinishing, woodworking, and general painting applications.

Product Overview

Professional HVLP Spray Gun

This HVLP (High Volume Low Pressure) gravity feed spray gun is engineered for high-performance coating applications. Its gravity-fed design ensures consistent material flow, while adjustable fluid and air controls allow for precise atomization and spray pattern customization. Built for durability and ease of maintenance, it is an ideal solution for automotive refinishing, woodworking, and general industrial painting tasks.

Technical Specifications

Technology	HVLP (High Volume Low Pressure)
Feed Type	Gravity Feed

Key Features

Performance Highlights

1 Improved

Transfer Efficiency

1 Reduced

Overspray

Recommended Applications

Automotive Refinishing, Woodworking, General Painting

Maintenance & Design

Design Advantages

- Adjustable fluid control
- Adjustable air control
- Durable construction
- Easy to clean
