

HVLP Professional Painting Gun

This HVLP professional painting gun is designed for automotive refinishing, industrial coating, and general painting applications. It features adjustable fluid, fan pattern, and air pressure controls for precise application.

Product Overview

Professional HVLP Painting Solution

This High Volume Low Pressure (HVLP) professional painting gun is engineered for precision in automotive refinishing, industrial coating, and general painting tasks. Featuring a durable aluminum body and a stainless steel fluid nozzle, it ensures long-term reliability and compatibility with both solvent-based and water-based coatings. The gravity-feed design combined with fully adjustable fluid, fan pattern, and air pressure controls allows for superior application accuracy.

Technical Specifications

Paint Cup Capacity	600 ml
Nozzle Material	Stainless Steel
Body Construction	Aluminum
Feed System	Gravity-feed

Performance Features

Adjustable Controls

- Fluid flow
- Fan pattern
- Air pressure

Recommended Applications

Automotive Refinishing • Industrial Coating • General Painting

Coating Compatibility	Solvent-based paints, Water-based paints
-----------------------	--

Requirements

Power Requirement	Air Compressor
