

HVLP Professional Spray Gun

This high-volume, low-pressure (HVLP) professional spray gun is suitable for automotive refinishing, industrial coating, and woodworking. It features adjustable fluid and air controls for precise material delivery and spray pattern.

Product Overview

Professional HVLP Spray Gun

This High Volume Low Pressure (HVLP) professional painting gun is engineered for precision and efficiency across a wide range of coating applications. Designed to minimize overspray, it significantly reduces material waste while enhancing transfer efficiency for cleaner, more professional results. Built with durable materials, it is an ideal solution for automotive refinishing, industrial coating, and woodworking projects.

Technical Specifications

Spray Technology	HVLP (High Volume Low Pressure)
Feed System	Gravity-feed

Features

Adjustable Controls

- Adjustable fluid control
- Adjustable air control
- Adjustable spray pattern

Performance Benefits

1 High

Overspray Reduction

1 Improved

Transfer Efficiency

Application

Primary Applications	Automotive Refinishing, Industrial Coating, Woodworking
